

APPENDIX A

BUDGET

RATIONALE FOR FUNDING

The objective of the Unified Planning Work Program (UPWP) process is to provide a rational basis for the development, review, approval, execution and control of a comprehensive and coordinated transportation planning program for the OKI Region.

A number of federal, state and local organizations contribute funds to the program. Partner agencies are also recipients of these funds and have the responsibility of completing the described program activities. The UPWP ties the various resources, needs, interests, and responsibilities into a coordinated annual work program.

The first phase of the process is a determination of what work elements are to be included in the UPWP. This is based upon (1) new federal and state directions and directives, (2) continuing requirements, and (3) local needs, interests and priorities.

Following an evaluation of which elements best serve the needs of the region, while at the same time fulfilling the agency's objectives, a comparison of joint interest and the benefits that will be derived is made. Based on the output of this process, a funding table is prepared for inclusion in the UPWP. The funding agencies, in their review of the work program, make a determination of the appropriateness of the funding level and source of funds. Comments or requests for changes are then incorporated into a revised UPWP. Throughout the process, the basic premise of maintaining a regional, continuing, cooperative and comprehensive planning process prevails.

The FY 2021 UPWP reflects selectivity in the allocation of funding sources to program activities. This procedure and the subsequent matching of funding sources to program activities reflect consideration of:

- Amount of resources available from each agency;
- Primary interest area of each funding agency;
- Potential for delays in funding by each funding agency;
- Primary interest and type of each recipient agency; and
- Desirability of maintaining a single funding arrangement for each grouping of work activities.

In summary, while it is administratively necessary and advantageous to selectively match funding sources with work activities or groupings, the basic philosophical intent is to maintain a single integrated comprehensive and coordinated transportation planning program that jointly serves the needs of local, state and federal interests.

Work Performance Responsibility

All work is performed by staff except where indicated. OKI may contract with consulting firms using OKI's procurement procedures which are consistent with 2 CFR 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. Consultants provide access to additional resources and expertise. Elements utilizing consultants are identified in the text of that element. The budgeted amounts are identified within the following budget tables.
